

A Caueat for the Borrower: or, a perfect table of vsurie, shewing how much the principall summe,
with the interest, and interest vpon interest, from one pound to a thousand amounteth vnto yearly for twentie one yeares,
after the rate of ten in the hundred.

Explication of this Table.

- The first colunne on the left hand, and last colunne on the right hand, descending downwards, is yeares complete, from 1 to 21 thrise repeated.
- All the other colunnes betwixt them, concluded in three spaces or distinctions, containe summes of money, whereof that which is in the toppe alone, by it selfe is the principall summe first lent, which in the first space ariseth from 1 l. to 9 l. in the second space from 10 l. to 90 l. in the third space from 100 l. to 900 l. All the other colunnes haue summes of money containing not onely the principall, but the encrease thereof, and the encrease of the encrease, according to the principall summe in the head or toppe, and seuerall yeares in the first colunne on the left hand, or last colunne on the right hand: as for example, j l. principall amounteth by interest and interest vpon interest in 7. yeares, to j l. 18. s. 11 d. ob. q. and so of all the rest.
- For any other number or principall summe, not mentioned in this table, whereof you would know the interest with the principall, &c. breake it into two or more parts and seeke their encreases seuerally, and adde their totall summes: for example, 14 l. in 7. yeares. I breake 14 l. into 10 l. and 4 l. and I finde that 10 l. in 7. yeares commeth to 19 l. 9. s. 8 d. ob. 3 q. and 4 l. in 7. yeares commeth to 7 l. 15. s. 10 d. ob. farth. which added together, make 27 l. 5. s. 7 d. ob. q. and so much 14 l. amounteth vnto in 7. yeares. By the same order you may know the value of any summe greater then is in the table.

The vse of this Table.

- By this table you may know readily what the principall with the interest and interest vpon interest amounteth vnto yearly for 21. yeares.
- Likewise you may know the increase of annuities, adding the summes together of all the yeares saue one, and in stead of that one yeare take the principall: thus, j l. annuities in 6. yeares by addition of all the summes vnder it for 6. yeares, commeth to 8 l. 9. s. 8 d. ob. 3 q. to which adde the annuities j l. and it amounteth to 9 l. 9. s. 9 d. ob. farth. and so much j l. annuities amounteth vnto in 7. yeares.
- To conclude, by this table you may value all money bargaines, for lands, leases, annuities, pensions, rents, in present possession, or in reuerfion, and all other contracts by the gaine or losse thereof, after the rate of ten in the hundred.
